

# Romero Mariano

## Programming Student (UTN) | Junior Software Developer

Bahía Blanca, Argentina (GMT -3) · [LinkedIn](#) · [Portfolio](#) · +54 2915262746 · [marianoromero97.mr@gmail.com](mailto:marianoromero97.mr@gmail.com) · [GitHub](#)

---

Programming student at Universidad Tecnológica Nacional (UTN) with hands-on experience in software development through frontend and full stack projects. Skilled in React.js, Next.js, TypeScript, Redux Toolkit, Tailwind CSS, Firebase, Stripe and familiar with Node.js, PostgreSQL, Python and C++. Recognized for being proactive, a fast learner, and a strong team player. Open to opportunities in IT including development, support, QA or related areas.

## PROFESSIONAL EXPERIENCE

---

### SSG Distribuidora – (Freelance)

*January 2025 – March 2025*

- Developed a platform to showcase the company's product catalog.
- Built the user interface with **Next.js** and **TypeScript**.
- Applied styles using **Tailwind CSS** and the **shadcn/ui** library.
- Implemented product display using a JSON file, eliminating the need for a database or backend.
- Optimized user experience with an intuitive and responsive interface, ensuring smooth navigation across devices.

### **Reserve Pro**

*January 2024 – March 2025*

- Defined features and views for the web application.
- Refactored legacy code and cleaned it to reduce boilerplate.
- Developed an appointment management system.
- Technologies: React, TypeScript, Tailwind CSS, Shadcn, Clean Architecture.

## FEATURED PROJECTS

---

### ChampionGear – Frontend Developer (Group Project)

*July 2024 – August 2024*

- Developed a sportswear e-commerce site using React.js, Redux Toolkit and Firebase.
- Integrated Stripe for secure payments.
- Created reusable components to enhance UI consistency and user experience.
- Collaborated with a backend team working in Node.js and PostgreSQL.

### Thematic Cards Web App – Full Stack Developer (Individual Project)

*June 2024 – July 2024*

- Developed a fullstack web app that consumes an external API to display thematic cards with detailed views.
- Implemented routes for creating new cards and additional functionalities.
- Used React.js, Redux, Axios and CSS Modules to build the frontend.
- Designed a modular, clean UI and managed application state effectively.

## TECHNOLOGIES

---

- **Programming Languages:** Javascript, Typescript, Python, C++
- **Frontend:** React, Next.js, HTML, Tailwind
- **Backend:** Node.js, Express
- **Database:** PostgreSQL
- **Tools:** Git, GitHub, Axios, Docker, Stripe, Firebase

## EDUCATION

---

### Universidad Tecnológica Nacional (UTN)

*University Degree in Programming (70% of the course completed)*

Bahía Blanca, Argentina

March 2024 – Present

### Oxford Institute

*English Education*

Bahía Blanca, Argentina | Completed 2015

## ADDITIONAL EDUCATION

---

### Cisco Networking Academy

*Python Essentials 1*

May 2023

## LANGUAGES

---

- **Spanish:** Native
- **English:** Intermediate (B2)

## VOLUNTEER EXPERIENCE

---

### Scout Argentina

*March 2018 – March 2025*

Active participation as a member and later as a scout leader.

Involved in leadership, teamwork and community service activities.

Developed soft skills such as collaboration, communication and responsibility.
