Graduate Computer Programmer from UTN with end-to-end freelance experience (frontend + backend + database + integrations such as WhatsApp) and a solid foundation in software architecture and web development. Specialized in technologies such as JavaScript, TypeScript, React, Next.js, and Node.js. Focused on writing clean, scalable code.

PROFESSIONAL EXPERIENCE

Punto Fiesta – (Freelance)
May 2026 – August 2026

- Built the public-facing e-commerce site (catalog, cart, and checkout) using Next.js 16, TypeScript, Tailwind CSS, and Zustand for state management.
- Built a custom admin dashboard for order management, enabling staff to confirm purchases and update order status in real time.
- Developed the REST API with Express, TypeScript, and PostgreSQL, connecting both the public site and the admin dashboard to the database.
- Implemented a manual payment flow (bank transfer or cash) with automatic WhatsApp confirmation messages sent to customers once an order is approved from the dashboard.

Blackout Landing Page – (Freelance)
March 2026 – April 2026

- Developed a modern landing page for a local business using React and TypeScript.
- Designed a responsive and optimized interface focused on improving digital presence and user experience.
- Implemented frontend best practices and deployed the project using Vercel.

SSG Distribuidora – (Freelance)
January 2025 – March 2025

- Developed a high-performance digital product catalog using **Next.js** and **TypeScript**.
- Implemented a data architecture based on static JSON files, achieving near-instant load times and eliminating server infrastructure costs.
- Designed a professional and responsive interface using **Tailwind CSS** and **shadcn/ui**, ensuring seamless navigation across all devices.

Reserve Pro (Collaboration)
January 2024 – March 2025

- Collaborated on the maintenance and evolution of the user interface using **React** and **TypeScript**.
- Participated in code refactoring and boilerplate cleanup to improve project maintainability and readability.
- Supported the definition of views and components following **Clean Architecture** patterns

FEATURED PROJECTS

Sports Supplements E-commerce – (Capstone Project - UTN) |
November 2025 - *February 2026*

- Led the Frontend development, creating a dynamic interface for a product catalog with real-time stock management.
- Implemented complex shopping cart logic, including data persistence (Local Storage/State) and checkout flow validations.
- Ensured seamless integration with the backend API, managing data consumption and efficient component rendering.

TECHNOLOGIES

- **Programming Languages:** JavaScript, TypeScript, Python, C++
- **Frontend:** React, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Shadcn/ui.
- **Backend:** Node.js, Express
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase
- **Tools:** Git, GitHub, Docker, Axios, Power BI, Claude Code

EDUCATION

Universidad Tecnológica Nacional (UTN)
Associate Degree in Computer Programming | Graduated
Bahía Blanca, Argentina
March 2024 – February 2026
GPA: 8.67 / 10

Oxford Institute
English Education
Bahía Blanca, Argentina | Completed 2015

ADDITIONAL EDUCATION

Cisco Networking Academy
Python Essentials 1
May 2023

Anthropic
Claude 101 - ID de credencial: ygz4z7kgy7t6
May 2026

Anthropic
Claude Code 101 - ID de credencial: g2d4fmc97hjh
June 2026

LANGUAGES

- **Spanish:** Native
- **English**: Intermediate (B2)

VOLUNTEER EXPERIENCE

Scout Argentina
March 2018 – March 2025

- Active member and Scout Leader.
- Developed **soft skills**: team leadership, assertive communication, collaborative work, and accountability in community service projects.
